

MINISTRY OF INDUSTRY AND MINERAL RESOURCES

MVP2 HANDOFF AND CONTINUATION CONTRACT

Standalone handoff for a new ChatGPT conversation to continue the Inspection Platform program with the same documentation quality, visual system, storyboards, acceptance discipline and zero-regression rules established for MVP1.

Document code	Version	Date
MIM-INSP-MVP2-HANDOFF	2.0 - MVP1 Final Documentation Contract	10 July 2026

BINDING DELIVERY RULE

MVP1 is governed by the complete 9-tab, 478-row customer/auditor spreadsheet baseline. No requirement may be silently removed, weakened, generalized away, replaced by mock behavior, or deferred to MVP2. Strategic BRD content is used only to close implementation-critical gaps and strengthen integrity, auditability, security, offline resilience and operability.

Primary audience	Status
Business, Design, Engineering, QA and Fable/Claude implementation teams	Authoritative implementation input - use with the MVP1 acceptance workbook

1. Purpose of this handoff

MVP2 is intentionally paused in the current MVP1 documentation stream. This handoff allows a separate ChatGPT session to start MVP2 without losing the product history, source hierarchy, split decision, quality bar or document style. The next session must treat MVP1 as the established precedent and must produce an equivalent MVP2 documentation pack that looks and reads like a deliberate continuation of the same program.

2. Program decision already made

- MVP1 is spreadsheet-first and delivers 100% of the 9-tab, 478-row customer/auditor baseline, strengthened only by essential platform foundations.
- MVP2 contains strategic expansion from the 734-page BRD, 61-sheet strategic workbook and original strategic storyboards that is not required for strict MVP1 delivery.
- No MVP1 requirement may be silently moved into MVP2.
- No valuable strategic capability is lost; it must be explicitly categorized, designed and traced in MVP2.
- MVP2 documentation must use the same typography, hierarchy, colors, table patterns, terminology, source traceability, storyboard format and acceptance/evidence discipline as MVP1.

3. Files the new ChatGPT session must receive

File / source	Role in MVP2 session
MIM_Inspection_MVP1_BRD_Enhanced_Final.pdf	Established business, journey, storyboard, engine, state and acceptance baseline.
MIM_Inspection_MVP1_Breakdown_and_Acceptance_Contract.xlsx	478-row contract and workbook pattern that MVP2 must emulate.
MIM_Inspection_MVP1_Native_Storyboard_Book_20_Pages.pdf	Visual/narrative quality reference: one storyboard per page.
MIM_Inspection_MVP1_Web_Portal_Functional_Specification.pdf	Channel specification pattern.
MIM_Inspection_MVP1_Admin_Portal_Functional_Specification.pdf	Engine/control-plane pattern.
MIM_Inspection_MVP1_iPad_Functional_Specification.pdf	Field/offline/GIS pattern.
MIM_Inspection_MVP1_UIUX_Design_Authority_Mobbin_MCP.pdf	Design discovery and synthesis authority.
MIM_Inspection_MVP1_Zero_Regression_and_Evidence_Contract.pdf	Acceptance and change-control precedent.
734-page strategic BRD/PDF	Primary strategic source for identifying MVP2 capability families.
61-sheet strategic baseline workbook	Structured strategic requirements reservoir.
Original 20-storyboard strategic pack	Historical visual/product direction that must be reinterpreted for MVP2 rather than blindly copied.

4. MVP2 starting scope reservoir

ID	Capability	Deferred scope	Source
MVP2-001	Advanced Risk Studio	Model lifecycle, variable library, weights, thresholds, simulation, explainability and scheduled risk runs.	Baseline workbook: 07_Risk_Studio; 18_Admin_Modules
MVP2-002	Advanced Workflow Studio	No-code workflow designer, transition/guard catalog, workflow versioning and broader object orchestration.	Baseline workbook: 08_Workflow_Studio; 18_Admin_Modules
MVP2-003	General-Purpose No-Code Form Builder	Reusable drag/drop component catalogue, conditional logic and multilingual form design beyond the exact MVP1 compliance package needs.	Baseline workbook: 11_Form_Builder; 18_Admin_Modules

ID	Capability	Deferred scope	Source
MVP2-004	Advanced AI Planning and Explainability	AI campaign summaries, recommendation rationales, advanced risk targeting and planning suggestions beyond mandatory spreadsheet behavior.	Strategic BRD/PDF; baseline workbook 47_Practical_AI_Use_Cases
MVP2-005	Executive National Health and Strategic Dashboards	National health index, heatmaps, strategic trends and executive intelligence not required for spreadsheet-aligned MVP1.	Baseline workbook: 16_Platform_Modules; 17_Web_Modules
MVP2-006	Advanced GIS/GMap Intelligence and Route Optimization	Multi-layer GIS, hotspots, route optimization and advanced planning intelligence beyond MVP1 navigation/check-in requirements.	Baseline workbook: 10_GIS_Map; 45_GIS_GMap_Infrastructure; 52_Map_UI_Opps
MVP2-007	External Portal Self-Assessment	Factory self-assessment submission, scoring, evidence and follow-up journeys beyond MVP1 inspection execution.	Strategic BRD/PDF; baseline workbook platform/web modules
MVP2-008	Correction and Re-Inspection Management	Full post-decision corrective action lifecycle and re-inspection orchestration beyond MVP1 Level 2 return/resubmit loop.	Strategic BRD/PDF; prior storyboard 14
MVP2-009	Objection and Appeal Management	Formal objection submission, appeal review, committee/decision workflow and related communications.	Strategic BRD/PDF; prior storyboard 15
MVP2-010	Committee Decisioning and Digital Approval	Broader committee decision, approval conditions and digital approval capabilities not required by the 9-tab spreadsheet.	Strategic BRD/PDF; prior storyboards 09 and 11
MVP2-011	Advanced Digital Signature / PKI Integration	Enterprise e-signature, consent and non-repudiation integration beyond any MVP1 locally required acknowledgement/signature behavior.	Baseline workbook: 34_V4_Digital_Signature; Strategic BRD/PDF
MVP2-012	Audit Replay and Time-Travel Reconstruction	Advanced point-in-time reconstruction and replay views beyond mandatory immutable audit timeline.	Baseline workbook: 36_V4_Inspection_History; Strategic BRD/PDF
MVP2-013	Predictive SLA and Operations Intelligence	Predictive breach detection, advanced workload recommendations and proactive anomaly intelligence.	Strategic BRD/PDF; baseline workbook 47_Practical_AI_Use_Cases
MVP2-014	Advanced Device Administration	Device registration, policy controls, compliance monitoring and remote administrative controls beyond minimum MVP1 execution needs.	Baseline workbook: 19_iPad_Field; 18_Admin_Modules
MVP2-015	Expanded Integration Ecosystem	Broader enterprise integration endpoints, advanced API governance and future external data providers beyond MVP1 source dependencies.	Baseline workbook: 32_V4_Enterprise_Arch; Strategic BRD/PDF
MVP2-016	Bilingual / RTL Experience Expansion	Full Arabic/English authoring and translation-completeness tooling across advanced studios and future external experiences.	Baseline workbook: 11_Form_Builder; 41_V4_UIUX_Playbook
MVP2-017	Advanced Analytics and Regulatory Trend Intelligence	Cross-regulation trends, repeat violation analysis, predictive patterns and broader BI capabilities.	Baseline workbook: 17_Web_Modules; Strategic BRD/PDF
MVP2-018	Advanced Map UI Opportunities	Heatmaps, clustering, route comparison, smart overlays and advanced spatial analytics beyond MVP1 live map.	Baseline workbook: 52_Map_UI_Opps
MVP2-019	Advanced AI Evidence and Review Assistance	AI summarization, evidence quality flags, inconsistency detection and reviewer assistance beyond the spreadsheet mandatory workflow.	Inspection Project.xlsx AI Actions marked Phase 2; baseline workbook 47_Practical_AI_Use_Cases
MVP2-020	Strategic Platform Expansion Pack	Other approved strategic capabilities from the 61-sheet baseline and 734-page BRD not necessary for strict spreadsheet-first MVP1 delivery.	Strategic BRD/PDF and 61-sheet baseline workbook

5. Required MVP2 deliverables

- MVP2 Breakdown Spreadsheet - structured, professionally formatted and source-traceable.
- MVP2 BRD PDF - standalone and consistent with MVP1 document architecture and visual language.
- Exactly 20 MVP2 storyboards - one storyboard per page, separately deliverable as PNGs and natively represented in the BRD.
- MVP2 Web Portal Functional Specification for new/expanded web scope.
- MVP2 Admin Portal Functional Specification for new studios/engines and strategic governance.
- MVP2 iPad Functional Specification for new/expanded field capability, if applicable.
- MVP2 Acceptance Contract and Evidence Matrix - same rigor as MVP1.
- MVP2 Fable Master Build Contract and UI/UX Design Authority Addendum where new archetypes are introduced.
- MVP1-to-MVP2 dependency and non-regression matrix proving MVP2 does not damage MVP1.

6. MVP2 documentation method - mandatory sequence

Step	Action	Hard rule
1	Read MVP1 final pack first	Do not start by redesigning the program from memory.
2	Read strategic sources completely	734-page BRD, 61-sheet workbook and original storyboards.
3	Create explicit MVP2 source inventory	Every strategic capability receives stable ID and source reference.
4	Check overlap with MVP1	Do not duplicate, contradict or weaken existing MVP1 capability.
5	Define MVP2 product thesis and boundary	Explain why each capability belongs in MVP2 and what business outcome it adds.
6	Create 20 storyboard architecture	One page each; native BRD narrative plus visual page.
7	Create channel and engine contracts	Admin/Web/iPad ownership must be explicit.
8	Create acceptance/evidence contract	No feature without runtime proof, negative paths and regression guard.
9	Cross-document consistency audit	Terminology, states, objects, design system and source hierarchy must match MVP1.
10	Issue final MVP2 pack	Only after zero unresolved documentation gaps.

7. Visual and editorial continuity

- Use the same navy/green enterprise visual family, typography hierarchy, cover structure, table styles and high-contrast native storyboard format.
- Use the same requirement ID, storyboard ID, engine ID, acceptance ID and evidence ID conventions with MVP2-specific prefixes.
- Use the same document headers/footers, source authority language and zero-regression statements.
- MVP2 must look like Volume 2 of the same program. A different tone, random template or inconsistent design system is a documentation failure.

8. Starter prompt for the next ChatGPT session

You are continuing the MIM Inspection Platform program as the documentation orchestrator and content manager for MVP2. MVP1 is already locked as a spreadsheet-first 478-row implementation contract with an enhanced BRD, 20 native storyboards, Admin/Web/iPad functional specs, acceptance/evidence workbook, Fable build contract, UI/UX authority and zero-regression rules. Read every attached MVP1 final document first to learn the exact document architecture, terminology, visual language, source hierarchy and acceptance discipline. Then read the attached 734-page strategic BRD, 61-sheet strategic workbook and original strategic storyboard pack. Do not reopen MVP1 scope. Do not silently move any MVP1 requirement. Build MVP2 from the explicit strategic capability reservoir, preserve source traceability, create a complete MVP2 breakdown spreadsheet, a matching BRD, exactly 20 one-storyboard-per-page visual slices with native BRD narratives, channel specs, acceptance/evidence contract and Fable handoff. The MVP1 and MVP2 packs must look and read as two volumes of one program. Zero regression is mandatory.
